ELSEVIER

European Journal of Operational Research 116 (1999) 692–694

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 116

1 A fast interactive solution method for large capital expenditure selection problems
R.L. Tobin

16 Artificial neural networks in bankruptcy prediction: General framework and cross-validation analysis
G. Zhang, M.Y. Hu, B.E. Patuwo and D.C. Indro

33 From stochastic dominance to mean-risk models: Semideviations as risk measures
W. Ogryczak and A. Ruszczyński

51 A repeated matching heuristic for the single-source capacitated facility location problem
M. Rönnqvist, S. Tragantalerngsak and J. Holt

69 Application of decision analysis techniques to the Weber facility location problem
Z. Drezner and J. Guyse

80 An exact algorithm for the fuzzy *p*-median problem
M.J. Canós, C. Ivorra and V. Liern

87 A two-phase tabu search approach to the location routing problem
D. Tuzun and L.I. Burke

100 Quantitative and qualitative indices for the plant layout evaluation problem
L.C. Lin and G.P. Sharp

118 Application of the integrated framework for the plant layout evaluation problem
L.C. Lin and G.P. Sharp

139 Failure rate distributions for flexible manufacturing systems: An empirical study
M. Vineyard, K. Amoako-Gyampah and J.R. Meredith

156 A comparative study of dispatching rules in dynamic flowshops and jobshops
C. Rajendran and O. Holthaus

171 An improved part grouping model for minimizing makespan in FMS
Z.M. Mohamed, A. Kumar and J. Motwani

183 Minimizing the weighted number of tardy jobs and maximum tardiness in relocation problem with due date constraints
B.M.T. Lin and T.C.E. Cheng

194 Shortest-route formulation of mixed-model assembly line balancing problem
E. Erel and H. Gokcen

205 The permutation flow shop with buffers: A tabu search approach
E. Nowicki

220 A column generation based decomposition algorithm for a parallel machine just-in-time scheduling problem
Z.-L. Chen and W.B. Powell

233 OR Software – ORSEP: Operations Research Software Exchange Program, *Professor H.W. Hamacher (Ed.)*
Linear assignment procedures
R. Jonker and A. Volgenant

235 Cost optimal replacement of monotone, repairable systems
K. Sandve and T. Aven
249 A multi-server queueing model with locking
I. Adan, T. de Kok and J. Resing
259 Optimal decision making in a maintenance service operation
D.N.P. Murthy and E. Asgharizadeh
274 Jointly optimal allocation of a repairman and optimal control of service rate for machine repairman problem
E. Frostig
281 A condition based maintenance model for a two-unit series system
F. Barbera, H. Schneider and E. Watson
291 Manufacturer's pricing strategy and return policy for a single-period commodity
H.-S. Lau and A.H.-L. Lau
305 Pricing and lead time decisions for make-to-order firms with contingent orders
F.F. Easton and D.R. Moodie
319 Transfer pricing and decentralized dynamic lot-sizing in multistage, multiproduct production processes
T. Pfeiffer
331 Multi-echelon inventory control in divergent systems with shipping frequencies
M.C. van der Heijden
352 A perishable inventory model with positive order lead times
C.L. Williams and B.E. Patuwo
374 Stock replenishment policies for a stochastic exponentially-declining demand process
R.M. Hill, M. Omar and D.K. Smith
389 Determining optimal order splitting and reorder level for *N*-supplier inventory systems
D. Sedarage, O. Fujiwara and H.T. Luong
405 The infinite horizon non-stationary stochastic inventory problem: Near myopic policies and weak ergodicity
T. Iida
423 Evaluating attack helicopters by AHP based on linguistic variable weight
C.-H. Cheng, K.-L. Yang and C.-L. Hwang
436 Measuring aggregate process performance using AHP
F.X. Frei and P.T. Harker
443 A consistency improving method in the analytic hierarchy process
X. Zeshui and W. Cuiping
450 A discussion on Extent Analysis Method and applications of fuzzy AHP
K.-J. Zhu, Y. Jing and D.-Y. Chang
457 OR Software
H. Thiriez

461 Towards the qualitative, plan-based simulation of international crises
W. Balzer and J. Sander
477 On an approach to the modelling of problems connected with conflicting economic interests
E.B. Bajalinov
487 Eliciting and mapping qualitative preferences to numeric rankings in group decision making
O.K. Ngwenyama and N. Bryson
498 Interactive group decision making procedure under incomplete information
S.H. Kim and B.S. Ahn
508 An algorithm for systems welfare interactive goal programming modelling
T.Ch.U. Kalu
530 Simulated annealing for discrete optimization with estimation
T.M. Alkhamis, M.A. Ahmed and V.K. Tuan
545 An adaptive aggregation/disaggregation algorithm for hierarchical Markovian models
P. Buchholz

565 Aspirations and priorities in a three phase approach of a nonhomogeneous Markov system
A.C. Georgiou
584 An application of Lemke's method to a class of Markov decision problems
N. Matsubayashi and H. Nishino
591 Continuation method for nonlinear complementarity problems via normal maps
B. Chen, P.T. Harker and M.Ç. Pınar
607 New variants of finite criss-cross pivot algorithms for linear programming
S. Zhang
615 Vector equilibrium problem and vector optimization
C.J. Goh and X.Q. Yang
629 An ε-sensitivity analysis in the primal–dual interior point method
W.-J. Kim, C.-K. Park and S. Park
640 A mathematical programming approach to clusterwise regression model and its extensions
K.-n. Lau, P.-l. Leung and K.-k. Tse
653 Upper and lower approximation models in interval regression using regression quantile techniques
H. Lee and H. Tanaka
667 Nonlinear integer programming for optimal allocation in stratified sampling
K.M. Bretthauer, A. Ross and B. Shetty
681 Student *t*-tests and compound tests to detect transients in simulated time series
D.H. Ockerman and D. Goldsman

692 Contents Volume 116
